### Measuring PCBs in Biofilm, Sediment, and Invertebrates in the Spokane River: Screening Study

The Department of Ecology is providing technical assistance to the Spokane River Toxics Task Force. The Agency has drafted a Quality Assurance Project Plan for assessing PCBs in biofilms, sediment, and invertebrates in the Spokane River.

The Task Force has been asked to provide feedback on the draft plan because this is a specific project the Task Force requested Ecology's Environmental Assessment Program to conduct.

If you are a member of the Task Force, or a contracted technical review team for the Task Force, please provide your feedback to Siana Wong by Aug. 16, 2018.

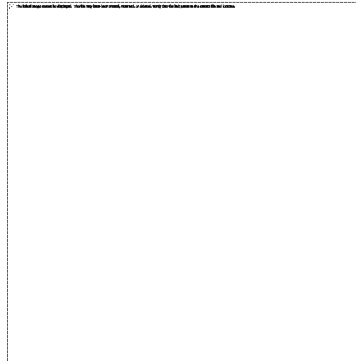

A copy of the QAPP has been posted on the SRRTTF website.

SRRTTF, c/o Department of Ecology, 4601 N. Monroe St., Spokane, WA 99205
